

Epsom and Ewell; Esher and Walton

Transport for the South East (TfSE) has just submitted its Strategic Investment Plan to government. This plan determines the investment needed to grow the south east's economy and deliver a high-quality, safe, sustainable and integrated transport system that makes the south east more productive and competitive, improves the quality of life for all residents, and protects and enhances its natural and built environment.

Since 2017, TfSE, the sub-national transport body for the south east, has become a powerful and effective partnership for the region, bringing together local transport authorities, local enterprise partnerships, district and borough councils, transport operators and strategic network owners to speak with one voice on our region's strategic transport needs.

Central to the development of this plan has been engagement and consultation with all stakeholders to ensure what we put forward aligns with both their needs and their expectations in a sustainable and financially responsible manner. It is a plan developed by the south east, for the south east.

To the right, we have mapped the prioritised schemes for Epsom and Ewell, Esher and Walton and the surrounding area; the schemes within the Strategic Investment Plan will be delivered from now to 2050.

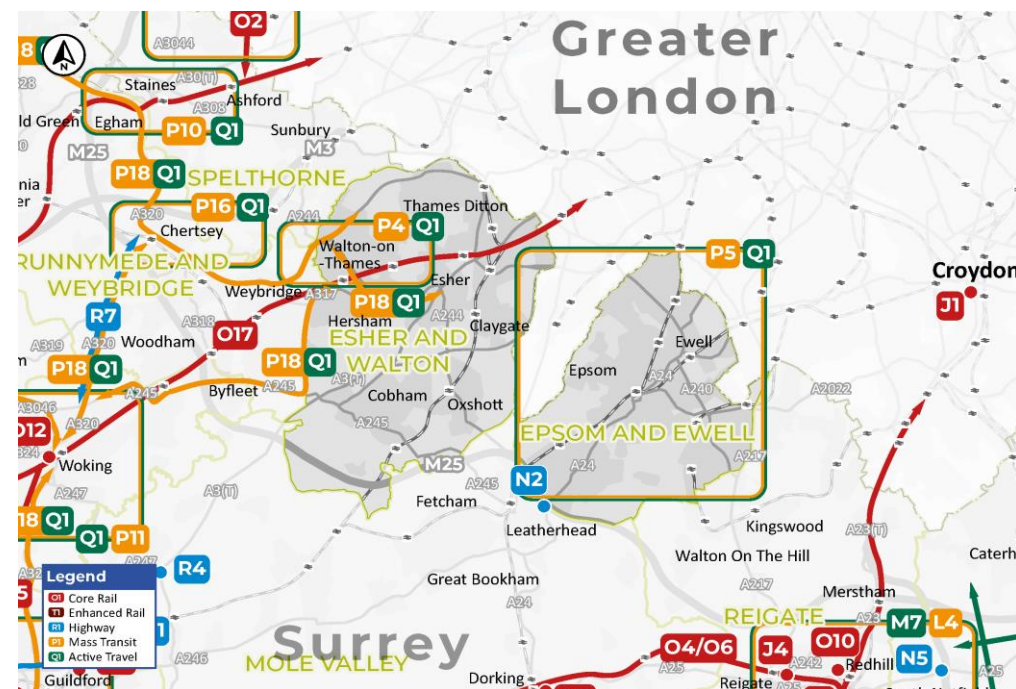

Figure 1: Epsom and Ewell; Esher and Walton schemes from TfSE's Strategic Investment Plan

In addition to place-specific schemes, a number of wider policy interventions have been identified. These include:

-  **Decarbonisation:** faster delivery on net zero carbon, including through the use and adoption of green technologies
-  **Public transport fares:** support for public transport, including subsidies for reduced fares
-  **New mobility:** capturing the benefits for new modes of travel, new ways of paying for our travel, and new technologies
-  **Road user charging:** support for a national scheme, and one that local areas can integrate with for additional measures (e.g. Clean Air Zones)
-  **Virtual access:** making best use of technology to reduce the need to travel and help plan better, more sustainable journeys
-  **Better integration:** at stations, hubs and between modes, but also better integration with spatial planning and service delivery

Strategic Investment Plan Factsheets
No. 13 Epsom and Ewell; Esher and Walton

Figure 2: Epsom and Ewell; Esher and Walton scheme descriptions and phasing

Map Ref.	Intervention name	What is the scheme?	What will the scheme do?	Phasing
N2	A24/A243 Knoll Roundabout and M25 Junction 9a (MRN Pipeline)	Improvements to the A24/A243 between the Knoll Roundabout and M25 Junction 9A.	Resolve existing congestion issues, distribute traffic, support access to new developments and provide new active travel infrastructure.	Medium term (2030s)
O12	South West Main Line / Portsmouth Direct Line - Woking Area Capacity Enhancement	Grade separation of the Portsmouth Direct Line and the South West Main Line at Woking rail junction on approach to Woking station.	Reduce Portsmouth / Guildford – London journey times and increase capacity on the South West Main Line.	Medium term (2030s)
O17	South West Main Line - Digital Signalling	Introduction of digital signalling on the South West Main Line.	Increase the capacity for (and safety of) rail passenger and freight movements.	Medium term (2030s)
P4	Elmbridge Bus Enhancements	Urban bus enhancements connecting centres within Elmbridge and adjacent economic hubs, including bus priority infrastructure where appropriate.	Improve journey times and reliability for public transport by increasing service frequencies, extending operating hours and delivering timetable integration.	Short term (2020s)
P5	Epsom/Ewell Bus Enhancements	Urban bus enhancements connecting centres within Epsom, Ewell and adjacent economic hubs, including bus priority infrastructure where appropriate.	Improve journey times and reliability for public transport by increasing service frequencies, extending operating hours and delivering timetable integration.	Short term (2020s)
P18	Berkshire, Hampshire and Surrey Inter-urban Bus Enhancements	Inter-urban bus enhancements, including bus priority measures.	Enable frequent, reliable, express services to run along roads connecting major economic hubs, e.g. Guildford to the Blackwater Valley via the A31.	Short term (2020s)
Q1	Berkshire, Hampshire and Surrey Urban and Inter-urban Active Travel Infrastructure	Inter-urban walking and cycling enhancements, utilising and enhancing the National Cycle Network.	Connect points of interest and provide safer, faster and more accessible segregated cycle infrastructure to encourage cycling and help to diversify residents' travel options.	Short term (2020s)
R11*	A3 Guildford Long Term Solution	Long-term solution to issues on the A3 in and around Guildford, potentially including at-grade or tunnelling options.	Improve journey time reliability and air quality along the A3 through Guildford whilst supporting strategic freight movements.	Long term (2040s)

* Intervention outside of constituency area and off-map.

Delivering interventions for Epsom and Ewell and Esher and Walton

Working with our partners we will now begin delivery of the nearly 300 interventions within the Strategic Investment Plan. Appropriate scheme and business case development will be required for each intervention, along with stakeholder engagement. Delivery will be dependent on each individual intervention and its local context, the complexity of the scheme, the stage of the scheme and business case development, as well as funding.

TfSE's role will be to support the appropriate delivery partners as we progress each scheme and secure funding for scheme development and delivery.

Along with local transport authorities, central government and its agencies, and other delivery partners, we will establish appropriate governance to oversee the development, delivery, and benefits realisation arising from interventions included in this strategy as we work to achieve the vision set out in our Transport Strategy.

By 2050, delivery of the Strategic Investment Plan will achieve for the south east:

21,000 additional new jobs

500,000 more rail trips each weekday

an additional £4 billion in GVA each year by 2050

1.5 million more bus, mass transit and ferry trips each weekday

1.4 mega tonnes less CO₂ equivalent emitted each year and a pathway to net zero identified

4 million fewer car trips each weekday

Help us to secure investment in the region's transport network

Please promote this investment plan in your local communities. We have submitted this plan to government and asked them to consider it when making future investment decisions for the region. Collectively we can deliver this ambitious plan and deliver a high-quality, safe, sustainable and integrated transport system that makes the south east more productive and competitive, improving the quality of life for all residents.

You can find the Strategic Investment Plan, the technical work behind it and our Transport Strategy on the TfSE website - www.tfse.org.uk, along with other factsheets.
