

# East Worthing and Shoreham; Worthing West

Transport for the South East (TfSE) submitted its Strategic Investment Plan to government in 2023. This plan determines the investment needed to grow the South East's economy and deliver a high-quality, safe, sustainable and integrated transport system that makes the South East more productive and competitive, improves the quality of life for all residents, and protects and enhances its natural and built environment.

Since 2017, TfSE, the sub-national transport body for the South East, has become a powerful and effective partnership for the region, bringing together local transport authorities, business organisations, district and borough councils, transport operators and strategic network owners to speak with one voice on our region's strategic transport needs.

Central to the development of this plan has been engagement and consultation with all stakeholders to ensure what we put forward aligns with both their needs and their expectations in a sustainable and financially responsible manner. It is a plan developed by the South East, for the South East.

To the right, we have mapped the prioritised schemes for East Worthing and Shoreham, Worthing West and the surrounding area; the schemes within the Strategic Investment Plan will be delivered from now to 2050.

**Figure 1:** East Worthing and Shoreham; Worthing West schemes from TfSE's Strategic Investment Plan

In addition to place-specific schemes, a number of wider policy interventions have been identified. These include:

-  **Decarbonisation:** faster delivery on net zero carbon, including through the use and adoption of green technologies
-  **Public transport fares:** support for public transport, including subsidies for reduced fares
-  **New mobility:** capturing the benefits for new modes of travel, new ways of paying for our travel, and new technologies
-  **Road user charging:** support for a national scheme, and one that local areas can integrate with for additional measures (e.g. Clean Air Zones)
-  **Virtual access:** making best use of technology to reduce the need to travel and help plan better, more sustainable journeys
-  **Better integration:** at stations, hubs and between modes, but also better integration with spatial planning and service delivery

**Figure 2:** East Worthing and Shoreham; Worthing West scheme descriptions and phasing

Map Ref.	Intervention name	What is the scheme?	What will the scheme do?	Phasing
F1	West Coastway Strategic Study	Delivery of recommendations from the West Coastway Strategy Study, including increased service frequencies and timetable optimisation for local and strategic movements between Southampton, Havant, Chichester and Brighton.	Reduce wait times and the effective journey times of rail users.	Medium term (2030s)
F2	West Worthing Level Crossing Removal	Removal of the West Worthing level crossing.	Improve safety and reliability for new and existing rail users along the West Coastway Line.	Medium term (2030s)
G1	Shoreham Strategic Mobility Hub	The development of a Strategic Mobility Hub at Shoreham, including rail, park and ride, bus services and active travel options.	Provide opportunities for efficient multi-modal journeys between the A27 and Brighton & Hove, Shoreham and Worthing.	Short term (2020s)
G5	Sussex Coast Mass Rapid Transit	Mass Rapid Transit enhancements connecting hubs along the Sussex coast by increasing service frequencies, extending operating hours and delivering timetable integration, together with segregated infrastructure where appropriate.	Improve journey times and reliability for public transport on the Sussex coast.	Medium term (2030s)
H1	Sussex Coast Active Travel Enhancements (including LCWIPs)	Inter-urban cycling enhancements along the Sussex coast, including by utilising the National Cycle Network.	Improve access to points of interest via segregated active travel.	Short term (2020s)
I4!	A27 Worthing and Lancing Improvement (RIS2)	Improvements to the A27 between Worthing and Lancing.	Increase capacity and improve the flow of traffic.	Short term (2020s)
I22!	A27 Worthing (Long Term Solution)	Improvements to the A27 Worthing Junction. A number of tunnel options have been considered to deconflict strategic and local traffic.	Increase the safety of all road users and safeguard journey time reliability.	Long term (2040s)
L7	A24 Corridor Rural Bus Service Enhancements	Inter-urban bus enhancements along the A24, including bus priority measures where appropriate.	Increase bus service frequencies, reduce journey times and improve reliability for residents between Dorking, Horsham and nearby centres.	Short term (2020s)
L13	A283 Corridor Rural Bus Service Enhancements	Inter-urban bus enhancements along the A283, including bus priority measures where appropriate.	Increase bus service frequencies, reduce journey times and improve reliability for residents between Pulborough, Petworth and nearby centres.	Short term (2020s)

! We acknowledge the recent announcement by the Chancellor regarding the A27 schemes. Our evidence-driven Strategic Investment Plan highlights that east-west connectivity, journey times and reliability remains a significant challenge across our region, particularly along the south coast corridor; the main east-west route through our region outside of the M25/M4 corridor. TfSE will continue working with the government and National Highways to explore multi-modal solutions that will address issues around congestion and route inconsistency and deliver agglomeration benefits along the whole south coast corridor, including at Chichester, Arundel, Worthing and east of Lewes.

## Strategic Investment Plan Factsheets

### No. 20 East Worthing and Shoreham; Worthing West

Map Ref.	Intervention name	What is the scheme?	What will the scheme do?	Phasing
M10*	West Sussex Inter-urban Active Travel Infrastructure	Inter-urban walking and cycling enhancements across West Sussex, utilising and enhancing the National Cycle Network.	Connect points of interest and provide safer, faster and more accessible segregated cycle infrastructure. This will encourage active travel and help to diversify residents' travel options.	Short term (2020s)
S2*	London Victoria Capacity Enhancements	Additional capability at London Victoria station, taking advantage of a major track renewal in CP8/9, as well as digital signalling on lines approaching the station from the South East in the longer-term.	Enable more services between London and Kent, Medway and East Sussex, reduce headways and improve journey time reliability.	Medium term (2030s)

---

### **Delivering interventions for East Worthing and Shoreham and Worthing West**

Working with our partners we will now begin delivery of the nearly 300 interventions within the Strategic Investment Plan. Appropriate scheme and business case development will be required for each intervention, along with stakeholder engagement. Delivery will be dependent on each individual intervention and its local context, the complexity of the scheme, the stage of the scheme and business case development, as well as funding.

TfSE's role will be to support the appropriate delivery partners as we progress each scheme and secure funding for scheme development and delivery.

Along with local transport authorities, central government and its agencies, and other delivery partners, we will establish appropriate governance to oversee the development, delivery, and benefits realisation arising from interventions included in this strategy as we work to achieve the vision set out in our Transport Strategy.

### **By 2050, delivery of the Strategic Investment Plan will achieve for the South East:**

21,000 additional new jobs

500,000 more rail trips each weekday

an additional £4 billion in GVA each year by 2050

1.5 million more bus, mass transit and ferry trips each weekday

1.4 mega tonnes less CO<sub>2</sub> equivalent emitted each year and a pathway to net zero identified

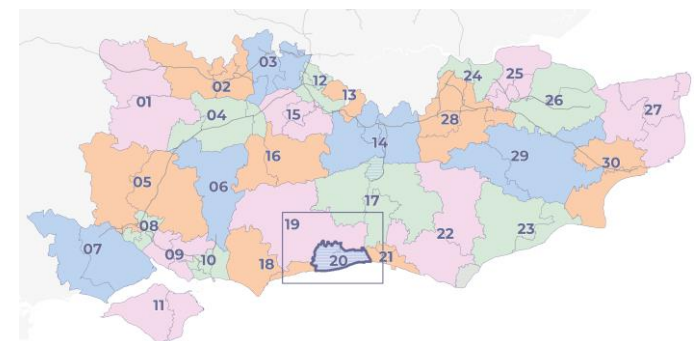

4 million fewer car trips each weekday

### **Help us to secure investment in the region's transport network**

Please promote this investment plan in your local communities. We have submitted this plan to government and asked them to consider it when making future investment decisions for the region. Collectively we can deliver this ambitious plan and deliver a high-quality, safe, sustainable and integrated transport system that makes the South East more productive and competitive, improving the quality of life for all residents.

You can find the Strategic Investment Plan, the technical work behind it and our Transport Strategy on the TfSE website - [www.tfse.org.uk](http://www.tfse.org.uk), along with other factsheets.
